

Flower Readings

For Mystic Minds

With

Richard Jelusich, Ph.D.

Saturday, September 23, 7:00pm

A **Flower Reading** begins when you bring a single flower with you to our gathering. Hold the flower for a moment before you attend; meditate if you wish. It will hold your unique "signature" of energies.

Everyone places their flowers on a table; Richard does not know who has brought which flower. Richard then reads the flowers, one by one, and reveals your essence, based on the energies you have imbued them with. Information is accurate for the individual, often including surprising elements about your true nature. Often, healing energies come through Richard to assist your healing process. Flower readings are designed to reveal your connection to all things and to show how your energies are imparted wherever you go.

What to do: Bring a single flower to the gathering. Be the only one to touch it. Asking permission to use the flower is honoring it. Flowers from the garden or the florist are fine. Size and type of flower is not important to the quality of the reading. Sit with your flower for a few moments. Meditate if you wish, and infuse the flower with your essence. Please arrive early, and do not show your flowers to Dr. Jelusich. Place your flower into the basket, careful not to touch the other flowers. Flower Readings: \$50 each reading, includes CD. *RSVP, please. Limit 12 readings. No limit to people attending.*

"Flower Readings began for me over 13 years ago, and has blossomed (ahem) into a popular way of doing intuitive readings and healings in the U.S. and Canada. The premise that 95% of all communication being energy and the anonymity of the flower readings combine to make a very powerful experience, especially for people who come for the first time and/or have no understanding of the reality of our metaphysical nature.

Flower Readings are based on psychometry, so the intermediary device does not need to be a flower. It could be a rock, coin, wrench or anything else. Flowers are great representations of you and I: we are always blooming and beautiful beings." Richard Jelusich PH. D.
